Liste d'outils / Gereedschappenlijst / Tools List / Werkzeugliste

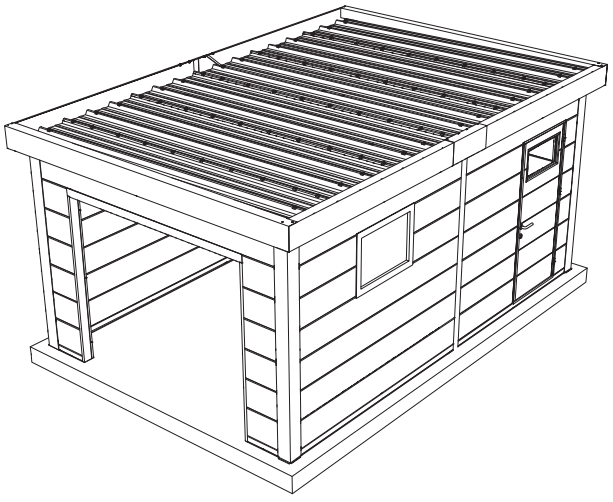

Liste des composants / Stukslijst / Partslist / Teileliste

Pour la liste actuelle des pièces, voir pièce jointe.
Voor de actuele stuklijst zie bijlage.
For the current parts list see attachment.
Aktuelle Stückliste siehe Anhang.

Fundament

- Le sol doit être **plat et de niveau**. Le sol doit être réalisé pour permettre une fixation adéquate de l'abris de jardin.
- De vloer moet **vlak en waterpas** zijn. De vloer moet gemaakt worden zodat de bevestiging van het tuinhuis wel mogelijk is.
- The floor must be **flat and level**. The floor must be made in such a way that it is possible to fix the garden house.
- Der Aufbauort muss eine **flache, geschlossene und in Waage liegende Bodenplatte** aufzeigen. Die Bodenplatte muss so beschaffen sein, das eine mechanische Befestigung von dem CLASSICO erfolgen kann.

PS

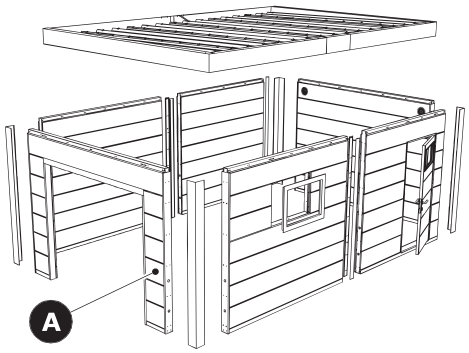

- L'abris de jardin doit être centrée sur la dalle de béton.
- Het tuinhuis moet gecentreerd geplaatst worden op het fundament.
- The garden house must be centered on the foundation.
- Das Gartenhaus muss auf dem Fundament zentriert sein.

- Garage 3663 : un tuyau d'évacuation d'eau est situé par défaut sur le côté gauche à l'avant et un autre est situé sur le côté gauche à l'arrière (avec pente de toit standard de droite à gauche). Si vous souhaitez que la pente du toit soit s'inclinée de gauche à droite, 1 tuyau d'évacuation d'eau est situé sur le côté droit à l'avant et un sur le côté droit à l'arrière. ATTENTION : si vous optez pour ce choix, vous devez le préciser lors de la commande, car, dans cette version, les points d'accrochage (perçages) de l'ouverture automatique de la porte seront positionnés différemment dans les panneaux de toiture
- Attention, profils de finition du contour de toiture ne se placeront correctement que si les panneaux de toiture sont à la bonne position, correctement alignés et l'équerrage du haut des murs soit correcte
- Visser après avoir installé le portail.

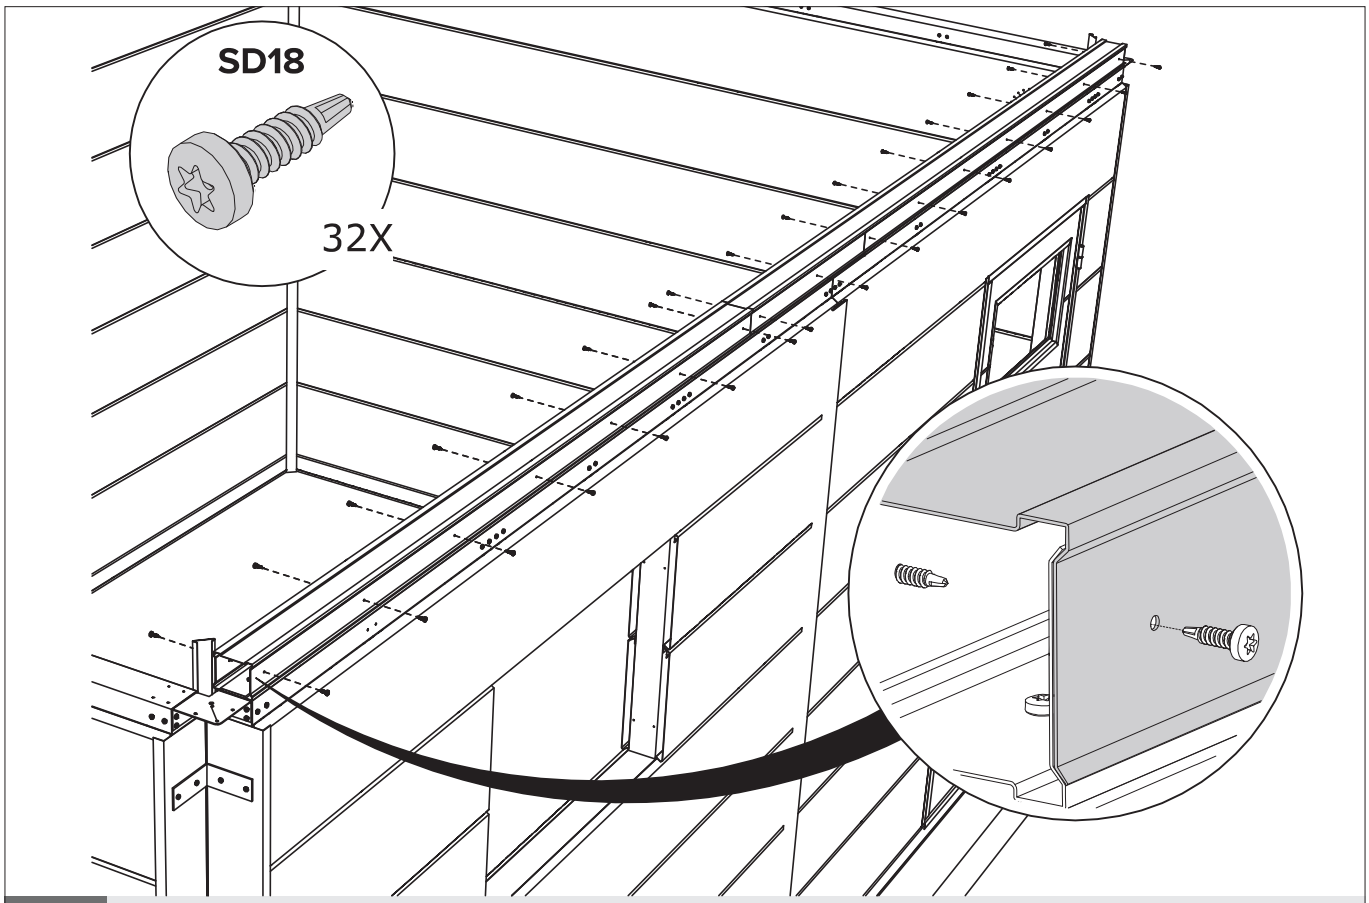

- Garage 3663 : 1 waterafvoerbuis bevindt zich standaard aan de linkerkant vooraan en ééntje aan de linkerkant achteraan (bij standaard helling dak van rechts naar links). Indien u de helling van het dak van links naar rechts wenst, bevindt 1 waterafvoerbuis zich aan de rechterkant vooraan en ééntje aan de rechterkant achteraan. OPGELET: u moet dit doorgeven bij bestelling, aangezien de ophangingspunten van de poort bij deze versie op een andere positie komen te staan in de dakpanelen.
- Hou er rekening mee dat de afwerkingsprofielen voor de dakranden alleen correct worden geplaatst als de dakpanelen in de juiste positie staan, correct zijn uitgelijnd en de hoeken aan de bovenkant van de wanden in een perfecte hoek van 90° zijn.
- Vastschroeven na installatie van de poort.

- Garage 3663: 1 water drain pipe is located as standard on the left front and one on the left rear (with standard roof slope from right to left). If you prefer the slope of the roof from left to right, 1 water drainage pipe is located on the right-hand side at the front and one on the right-hand side at the back. ATTENTION: you must specify this when ordering, as the suspension points of the gate are in a different position in the roof panels in this version.
- Start by installing the roof panels and check the position and parallelism to the walls.
- Please note that the finishing profiles for the roof edges are only correctly placed if the roof panels are in the correct position, correctly aligned and the corners at the top of the walls are at a perfect angle of 90 °.
- Tighten the screws after installing the gate.

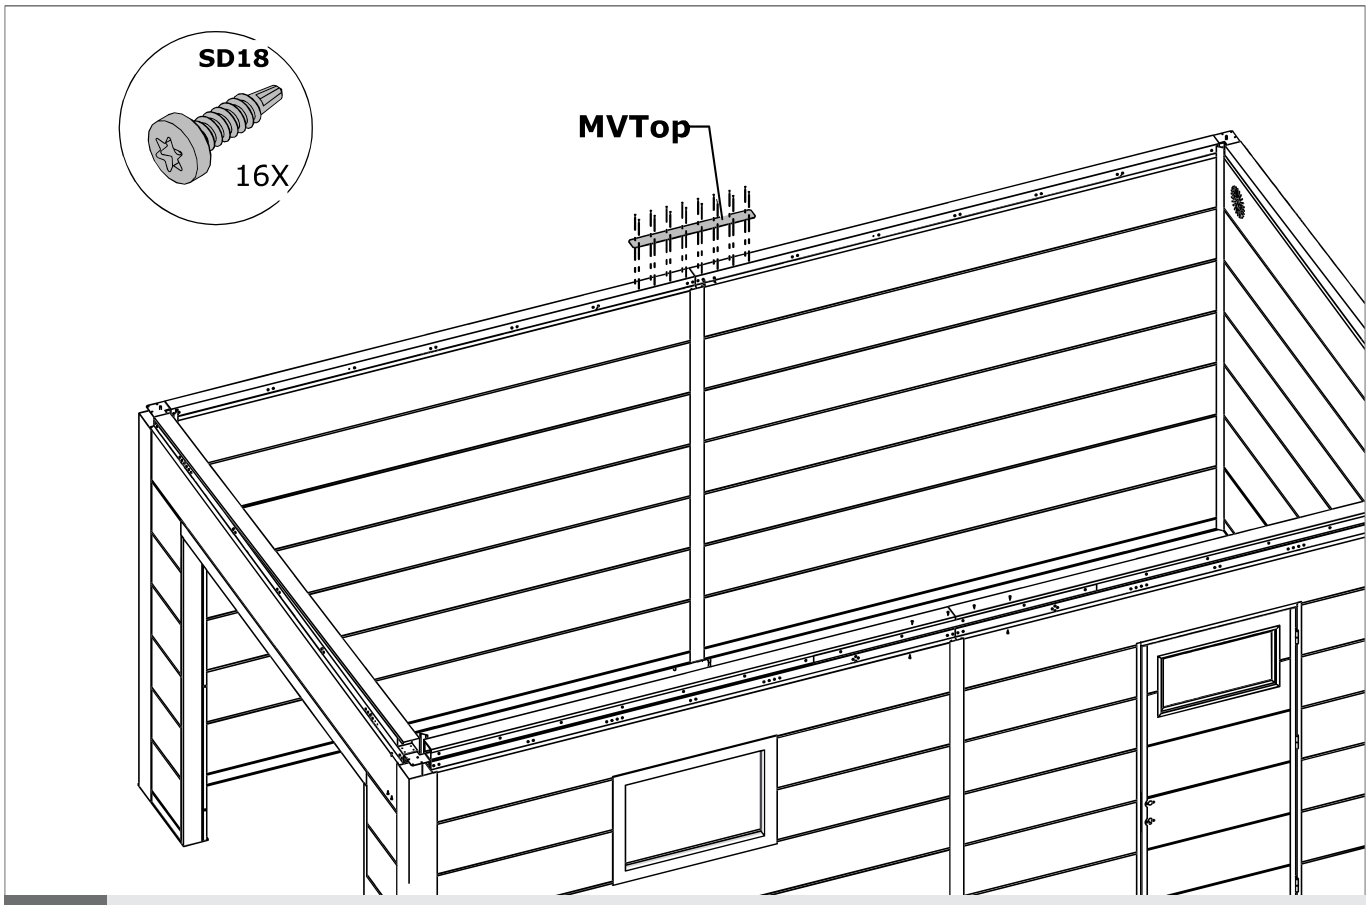

- Garage 3663: 1 Abflussrohr befindet sich standardmäßig auf der linken Seite vorne und ein weiteres auf der linken Seite hinten (bei serienmäßiger Dachneigung von rechts nach links). Wenn Sie die Dachneigung von links nach rechts wünschen, befindet sich 1 Abflussrohr auf der rechten Seite vorne und eines auf der rechten Seite hinten. ACHTUNG: Dies muss bei der Bestellung angegeben werden, da die Aufhängepunkte des Tores bei dieser Ausführung an einer anderen Position in den Dachblechen sind.
- Bitte beachten Sie, dass die Dachblenden-Abschlussprofile nur dann korrekt platziert werden, wenn sich die Dachpaneele in der richtigen Position befinden, korrekt ausgerichtet sind und die Oberseite der Wände in perfekte Hecken vom 90° montiert sind.
- Festschrauben nach dem Einbau des Tors.
